Jewelpix Jewellery Protection Guidelines

Document Version: 1.0

Effective From: *01/01/2025*

Purpose

This document outlines the image submission and verification guidelines for users applying for jewellery patent protection via the Jewelpix platform.

1. Image Submission Requirements

To apply for protection, users must upload:

- **Three images:** Front, Top, and Side views.

- Images must be clear, unfiltered, and free of watermarks.

2. Image Verification Process

Clicking the **"Verify"** button triggers AI-based evaluation that checks:

- Completeness and clarity of views

- Feature visibility and design uniqueness

- Accuracy of submission and similarity check

3. Accuracy Threshold

Images are scored on a 0–100 scale.

- **Score $\geq$ 90%:** User is allowed to apply for patent protection.

- **Score $<$ 90%:** User is not allowed to proceed. Feedback may be provided.

4. Additional Notes

- Submit only original jewellery images owned by the user.

- Avoid copyright violations—doing so leads to disqualification.

- Use a plain background for better accuracy.
